*This 100M Registry car belonging to Sid Shadle from San Anselmo, California, awaits its owner's arrival before heading out on an exciting Sunday afternoon of fast, back road touring.*

**T**he British Motor Industry Heritage Trust (BMIHT) has named the Worldwide 100M "Le Mans" Registry as a Liaison Officer to the Trust. This honor means that the 100M Registry will now be able to immediately trace any chassis number thought to perhaps be a factory 100M. It will no longer be necessary for members to contact the BMIHT and wait weeks to receive a certificate to see if a car is a genuine 100M.

This service will be provided free to all current members of the 100M Registry. If someone is planning to purchase a 100M, they can join the Registry as a "Supporting Member" and have any car they are considering purchasing traced and confirmed in a matter of a few hours. Once they purchase a 100M, their membership will be converted to an active car-owning member at no charge.

By joining as a Supporting Member, the individual receives all the 100M Registry benefits including a brass Registry dash plaque (when the car is acquired), a five-color jacket patch, a copy of the original "Special Equipment and Tuning Instruction" booklet, a copy of an original color Le Mans sales flyer, plus all past news-

letters. Additionally, they can qualify to purchase the Gerry Coker-designed and signed grille badge, the "100M Identification Guideline," an accurate "regulation Le Mans" hood belt, two-tone paint profile, cold-air-box notched bracket, and a set of color 100M restoration photos.

The 100M Registry also offers free registration for any factory-built 100M if the owner does not desire to receive the above

additional benefits or the opportunity to purchase the custom-made Registry items. To register, just go to the web-site: [www.100mregistry.com](http://www.100mregistry.com) and print the application. Send it in with photos of the car and of the VIN plate, its history and BMIHT certificate copy (unless we have already confirmed its build record for you).

This free build record trace service and free 100M Registry registration is another assistance the Worldwide 100M Registry is pleased to offer to its members. If you have any

questions or need help, contact Bill Meade, Registry Founder, at (831) 722-3253 or send email to [billmeade@100mregistry.com](mailto:billmeade@100mregistry.com).

HM

**A 100M Registry member in Italy found this badly deteriorated 100, thought to be possibly a 100M. He was able to request a rapid and free confirmation from the Registry as to whether the car is a factory 100M. It turned out to have some Le Mans equipment, but it was not a factory built 100M.**
